

Empathy Map

Date	30 June 2026
Team ID	*****
Project Name	Smart Lender – AI-Powered Loan Eligibility Prediction System
Maximum Marks	4 Marks

Empathy Map:

The empathy map is used to understand the customer's perspective by analyzing what they Say, Think, Do, and Feel during the loan application process. This helps design a user-centric and intelligent loan eligibility prediction system.

SAYS • I need a quick and reliable way to know whether my loan will be approved. • The loan process should be simple and transparent. • I want instant results without lengthy paperwork.	THINKS • Will my credit history affect the approval? • Is the prediction accurate and fair? • I hope my financial profile meets the requirements.
PERSONA NAME Credit Officer / Loan Applicant	
DOES • Enters personal and financial details. • Submits the loan application. • Reviews the prediction result. • Contacts the bank if additional verification is required.	FEELS • Anxious while waiting for approval. • Happy when the application is approved. • Confident if the prediction is fast and accurate. • Motivated to improve financial health if rejected.
