

Project Initialization and Planning Phase

Date	30 June 2026
Team ID	XXXXXX
Project Name	Smart Lender – AI-Powered Loan Eligibility Prediction System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand the customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A loan officer evaluating loan applications	Approve or reject loan applications quickly and accurately	Manual verification takes too much time	There is no automated intelligent system	Frustrated and less productive

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank loan officer evaluating loan applications	Approve or reject loan applications quickly and accurately..	Manual verification consumes a lot of time.	There is no automated machine learning-based loan prediction system.	Frustrated due to delays in decision making..
PS-2	AA loan applicant seeking financial assistance.	Check my loan eligibility before applying.	I don't know whether my application will be approved.	Banks have different eligibility criteria.	Confused and uncertain about loan approval.
PS-3	A bank manager handling multiple loan requests.	Improve loan approval efficiency while reducing risks	Manual verification leads to inconsistent decisions.	Human errors and lengthy paperwork affect accuracy.	Relieved and productive when Smart Lender handles batch predictions.
